Agro-advisory for Western Rajasthan August, 2013

Agro-advisory:

- ✓ Farmers are suggested for weeding in *kharif* crop along with boundary of field and farm road to clean the crop and minimizing the weed plant population in coming season.
- ✓ This is right time for hoeing in pearl millet, maintain inter row spacing and for in situ moisture conservation in field crops. Plants will use this moisture at the time of grain formation and grain maturity.
- ✓ Drain out the excess water from pulses crop field to farm pond and use excess water for next season crops.
- ✓ Farmers are advised to collection of tree leaves from all sources for feeding the goats or sheep.
- ✓ Farmers are advised for enrichment of dry fodder of crop residues of cereal crops through urea treatment.
- ✓ Supplementation of grazing animals with vitamin-mineral mixture rich feeds.
