Agro-advisory for Western Rajasthan March, 2013

Agronomical practices:

- Farmers are advised for irrigation especially for wheat crop because this period is grain filling stage, so irrigation in wheat crop is necessary to take higher yield in this period.
- Farmers are suggested for irrigation to cumin crop and clean the field from weeds.
- Farmers are suggested to harvest mustard crop in morning and keep it for threshing in safe place.
- If farmers have irrigation facility in their farm then suggest to them for sowing the summer vegetables in the month.
- Farmers are advised to prepare field for summer vegetable cluster bean crop and sow the summer varieties like M.G.365 and R.J.936 @ 10-14 kg/ha seed.
- Farmers are advised, who have irrigation facility they can prepare the field and sown the green fodder crop like bajara, chari and sorghum for livestock feeding in summer months.
