

## **On-Farm Training on Improved Kharif Crop Production Technologies organized at Chanchalwa village**

On-farm training on improved kharif crop production technologies was organized at Chanchalwa village in Balesar tehsil, Jodhpur district on July 3, 2024. The program was organized by Division of Transfer of Technology and Training and Scheduled Caste Sub Plan in which 65 farmers and farm women participated. Dr. Dipika Hajong informed farmers about the improved varieties in greengram, guar and moth bean. The method of seed treatment with Marusena-1bioformulation for control of soil-borne diseases in kharif crops was demonstrated to the farmers. Dr. Pramendra informed farmers about the quality seeds and planting material sold through institute ATIC. After the training, farmers were distributed with seeds of greengram (var. MH-421), moth bean (CAZRI Moth-4 & CAZRI Moth-5) and cluster bean (RGC-936) for organizing field demonstrations in upcoming kharif 2024. The programme was coordinated by Dr. Dipika Hajong, Dr. Pramendra and Sh.Jugal Kishor.
