

## On-Farm Training on Improved Kharif Crop Production Technologies organized at Ram Nagar and Hanuman Nagar villages

On-farm training on “Improved kharif crop production technologies” was organized by the Division of Transfer of Technology and Training and SCSP at Ram Nagar village in Balesar tehsil, Jodhpur district on July 05, 2024 in which 95 farmers from Ram Nagar and Hanuman Nagar participated. Dr. B. L. Manjunatha explained the objectives of the SCSP and guidelines in selection of farm households. He explained to the farmers on the improved production technologies in kharif crops. The method of seed treatment with Marusena-1 bioformulation for control of soil-borne diseases in kharif crops was demonstrated to the farmers. Dr. O. P. Meena demonstrated to the farmers on the use of Soil Health Card for judicious nutrient management. He explained the method of composting for enriching the farmyard manure. Dr. Premveer Gautam provided details to the farmers about the farm machineries to enhance the seed germination and optimum plant population in the field. After the training, the quality seeds of moth bean (*var.* CAZRI Moth-4 & CAZRI Moth-5), greengram (*var.* MH-421) and cluster bean (*var.* RGC-936 and RGC-1033) were distributed to the farmers for organizing field demonstrations in kharif 2024. The programme was coordinated by Drs. B. L. Manjunatha, O. P. Meena, Premveer Gautam and Sh. Jugal Kishor.
